# Christmas Puff Bead Assembly Instructions

*(Carefully Read all Directions before Assembling!!!)*

**Supplies Needed:** Foam Hair Rollers. These can be purchased at your local pharmacy. We recommend buying the medium size rollers. Rat Tail Cording in color of your choice (1 yard per 4 beads). 1½” Tassels and 12mm wooden beads in colors of your choice. Beads available at craft stores.

**IMPORTANT: WE RECOMMEND STITCHING THE 16CT VERSION OF DESIGN TO FIT MEDIUM SIZE FOAM HAIR ROLLERS.**

1. Trim finished stitching apart ½” all around; the short ends are the seam, and the long sides are pressed over ¼” to the wrong side. (the short ends can then be trimmed to ¼” for the seam.)
2. Seam the short ends together right sides together, or butt together by hand, wrong sides together. If you use the machine, the beads have to be turned by folding in with your finger or with the eraser end of a pencil. This can be tricky but persevere. If you seam by hand, make sure the colors in the design match perfectly. You now have a tube shape.
3. Using a needle and thread, stitch a running stitch all around the folded edge, starting opposite the seam line. Leave “tails” so you can gather up as in step #4. Cut foam rollers to the length of the stitching. (sizes vary in these designs) (*see A below*)
4. Twist the foam rollers into the stitched tube slowly until even on both ends, using the eraser end of a pencil, or inset tweezers through the tube and pull into place. Pull up running stitch on both ends and tie with several knots, leaving a hole in the middle for stringing.
5. Cut cording into four 8” pieces. Slip a coordinating tassel loop onto the cording and knot the cut ends together. Move the tassel to the knot, and pull the cording up through the foam bead with tweezers, until the tassel is correctly positioned. (the knot will be hidden inside the foam roller) Lace the wooden bead onto the top of the stitched bead and your ornament is now complete. (*see B below*) Enjoy!
